

## **Latest Cases of PED Hit New Record**

02 January 2014

**US - The adjustment to the figures for new cases of Porcine Epidemic Diarrhoea (PED) has made the last week's total the highest since the outbreak began.**

The American Association of Swine Veterinarians (AASV) is due to update its 'New Cases Report' for the week of 22 December later today.

The Association reports that 116 new cases were added during the week but no new states reported cases.

In addition, the National Animal Health Laboratory Network (NAHLN) added 66 new cases to those reported during the week of 15 December, making last week's total of 185 the highest since beginning of the outbreak.
